

SiteAudit

Overview

SiteAudit is the leading managed print services (MPS) software for small to enterprise organizations.

SiteAudit On-Site version 4.4 offers enhanced capabilities to track Move, Add and Change (iMAC/R) printer movements including automatic printer assignment to departments and locations. SiteAudit is the MPS tool for managing all makes and models, local and networked printers. Advanced Key Performance Indicators (KPIs) provide printer utilization, SLA tracking, print volume analysis and more.

Proactive alerts and reporting help to reduce supplies, inventory, operations and other costs related to fleet management.

Features

- Discovery and data collection using adaptive fleet technology, supports inclusion/exclusion
- Tracks users, local and networked printers
- Meter tracking of total, b/w, color, duplex, fax and over 23 separate counters
- Advanced supplies tracking including uptime, downtime, response time & SLA creating
- Tracks, alerts and reports on printer installs, moves, add, changes and retires (iMAC/R)
- 70 standard reports, add more with customized reports, web & scheduled reports
- Rule-based alerts and thresholds

Benefits

- Network traffic is imperceptible making it easy to gain customer acceptance
- Deploys fast and easy without security issues
- Accurate meter reads plus analysis of all volumes e.g. color and printer utilization helps reduce costs
- Control costs with just in time ordering. Reports replacement frequency, best cartridge yields.
- Improve printer uptime, reduce service response time with SLA tracking and reporting
- Reduces service costs; maintains printer history for accurate and constant meter and service tracking.
- Receive the latest information on costs, supplies, inventory, etc., to efficiently manage the fleet
- Alerts priorities that optimizes fleet performance

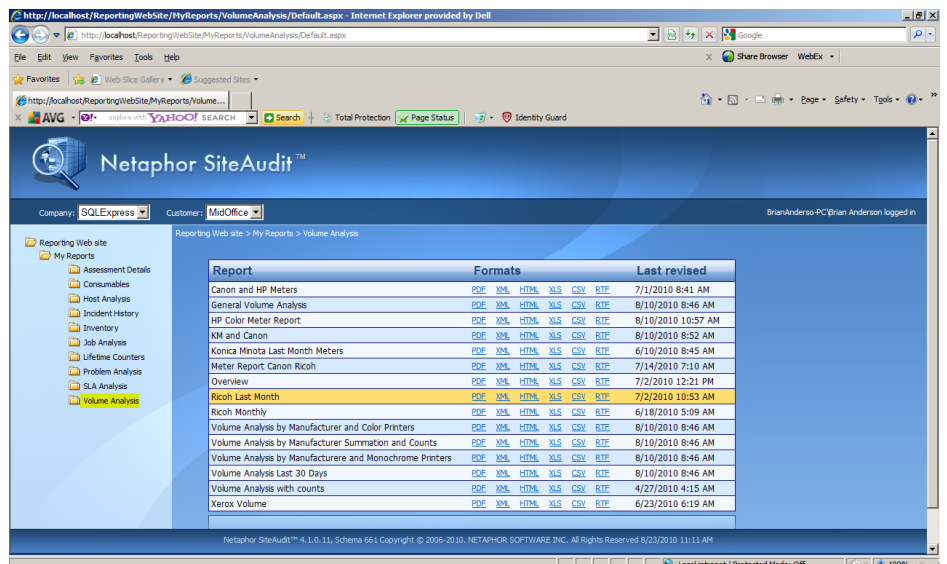

Applications

SiteAudit On-Site 4.4 is the best tool for IT asset managers and professional MPS service providers.

- Move, Add and Changes Inventory Management
- Comprehensive assessment reporting
- Meter reading and billing automation
- Capacity planning, rationalizations
- Service level creation and tracking
- Help desk trouble ticket integration
- JIT supplies management

New features in v4.4

- Enhanced iMAC/R - auto assign printers
- New analysis reports
- Added thresholds and diagnostics
- More supplies metrics - replacement date
- Enhanced support for Lexmark printers

The screenshot shows the Netaphor SiteAudit web interface. The main content area displays a table of reports with columns for Report, Formats, and Last revised. The table lists various reports such as 'Canon and HP Meters', 'General Volume Analysis', 'HP Color Meter Report', 'KX and Canon', 'Konica Minolta Last Month Meters', 'Meter Report: Canon Ricoh', 'Overview', 'Ricoh Last Month', 'Ricoh Monthly', 'Volume Analysis by Manufacturer and Color Printers', 'Volume Analysis by Manufacturer Summation and Counts', 'Volume Analysis by Manufacturer and Monochrome Printers', 'Volume Analysis Last 30 Days', 'Volume Analysis with counts', and 'Xerox Volume'. Each report row includes links for PDF, XML, HTML, XLS, CSV, and RTF formats, along with the last revised date and time.
