

Font Printing Solution

Special Fonts - for your Printer

Regardless of your corporate design standards, regardless your language, we're able to offer almost any font available to suit your needs. Wherever information has to be printed or displayed, fonts are needed. It is often necessary to embed fonts into devices like printers to achieve the goal a document with your unique appearance based on the corporate design standards. Based on our know-how built over the past 15 years and the agreement with the major font suppliers we're able to offer almost any font available.

If not already digitised we are also providing all needed services to generate new fonts based on the customers request. Based on this you are able to fulfil complete new areas like custom Logo-Fonts, custom handwriting Fonts or even custom symbols and symbolsets. If you are interested in such custom solutions please contact us to get together with our font consultants.

Other countries – other cultures and other characters. In lot of eastern & Asian countries like Russia or China you need to print complete different symbolsets than we use normally in Europe or US. To fulfil this need we have developed lots of font solutions for such foreign languages to be able to be printed with the needed symbols. Such font solutions are available for languages like Hebrew, Cyrillic, Chinese, Thai, Kanji and others please call us for your desired language.

Hardware Solutions for HP LaserJet Printers

Would you like to upgrade all of your printer's internal fonts so that you can reduce network traffic or print from non-Windows applications?

Low-cost ROM upgrades on SIMM, DIMM and MFC add a matching Font character to all of the printer's internal fonts in UNIX or DOS.
