

AutoStore

capturing, processing and storing paper-based information

Today information needs to move at network speed and paper only slows it down. Now you can easily turn paper-bound information into lightning-fast digital data with the push of a button. Share it, send it, use it in your favorite business applications, store it, search it—and make it work harder for you. AutoStore software gives you the power to streamline and optimize your processing. Forget manual processing of documents. AutoStore lets you classify documents, extract just the data you need, and deliver it wherever you want. AutoStore works seamlessly with your existing network, equipment and information technology, making it more powerful. You'll spend less time handling paper and more time using your valuable data to do business. Save time, money and paper.

Key features

- Capture electronic content from virtually any source (email, desktop, network folders, SFTP folders, MS Office applications, XML data streams, and more)
- Capture paper documents from scanner, MFPs, and copiers of leading manufacturers
- Index paper & electronic documents before storage
- Scan once and deliver to multiple destinations
- Personal workflows with network authentication
- Secure capture & delivery from SFTP sites along with document encryption
- Convert scanned documents into various formats (searchable PDF, WORD, EXCEL, etc.)
- Perform PDF file size reduction
- Enhance image quality with over 2 dozen filters
- Read barcodes, hand writing, and OMR and use as index data
- Perform Bates numbering of documents
- Advanced forms processing modules for structured and unstructured forms
- Optimize workflows as dynamics of your business change
- Open SDK supporting C++, C#, VB.Net, VB, and Jscript

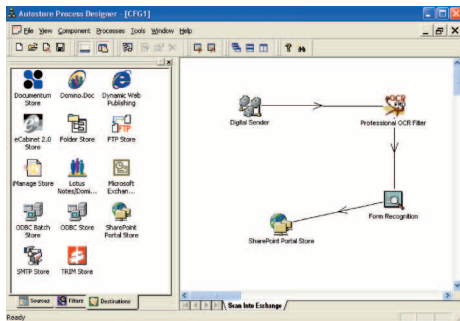

Capture

AutoStore captures documents from virtually any paper or electronic source, including MFP's copiers, desktop applications, emails, faxes, and other sources.

Process:

Using advanced process components such as OCR, barcode recognition, and forms recognition, AutoStore processes documents from a wide range of sources into useable business information.

Route:

AutoStore indexes and routes documents directly into selected business applications and databases with a single mouse click.

possible Input-Sources:

- MFP's & Networkscanner (HP, Kodak, Kyocera, Ricoh, Sharp, Xerox)
- TWAIN Scanners
- Email (SMTP, Exchange, POP3)
- Fax
- Folders (Local or Network)
- FTP sites (secure and unsecure)
- Batch Import (batch, XML, text, delimited formats, ASCII)
- PC Desktop
- Microsoft Office Applications
- ...and more

possible Processes:

- Document recognition
- Form recognition
- image improvement
- Barcode recognition
- Searchable PDF erstellen
- stamp functionality
- Notification (Mail)
- user outhentifikation (LDAP, Active Directory, e-Directory)
- encryption
- and more

possible Output Options:

- Send to Fax
- Send to Email
- Send to Folder (Local or Network)
- Send to FTP sites (secure and unsecure)
- Send to Database (Mocrosoft ODBC, Exchang Lotus Notes/ Domino)
- Send to Printers
- Send to PC
- DMS / ECM (Documentum, DocuShare, FileMagic, Fortis, Hummingbird iManage, Interwoven, LaserFiche, SharePoint, TRIM)
- ...and more
