AutoStore

Automate your document-driven business process

AutoStore is a server-based application which orchestrates the capture and secure delivery of paper and electronic documents into business applications. It is well suited for organizations of all sizes who want to eliminate error-prone manual document handling. Whether you're handling invoices, claims, applications or order forms, AutoStore can automate your document-driven business processes to help lower costs, improve operational efficiency, communication and collaboration, and support compliance with laws and regulations.

AutoStore utilizes your existing infrastructure and captures information from your multifunction peripherals, smartphone, emails, fax servers, shared/public folders, FTP sites, Microsoft® Office® applications, PC desktops, XML data streams and other sources. The captured information is then processed based on your organization's predetermined workflow. Scanned images are enhanced for improved readability, text can be converted into editable electronic information, barcodes can be read, resulting in rich information to be used for later retrieval.

Once processing is complete, the documents and the keywords describing them are distributed to any number of locations. Destinations can be faxed, emailed, stored in a document management system (DMS), on FTP sites, in secure network folders, or even multiple destinations simultaneously. All of this is performed effortlessly with just the push of a button on the front panel of the device. That's it. The workflow happens immediately, ensuring your information goes where you want it to go quickly and accurately every time.

This is all possible due to AutoStore's customizable workflows and personalized MFP menu panels. With the help of the Auto-Store Process Designer, workflows can be pre-configured and saved to reduce the amount of manual steps required by the end user. This simple and easy to use capability eliminates manual processes, which helps reduce user errors and results in accurate and efficient document processing.

Capture

Join paper and electronic document streams into uniform processes. Capture both paper and electronic documents from virtually any source - a desktop PC/Mac, a network scanner MFP/MFD or copier, and even your smartphone. AutoStore works with all leading copiers, smartphones, scanners and MFPs and works the same way across all platforms, every time. With AutoStore, changing or introducing a new device is as easy as plugging it into the network.

Process

Process all types of documents including images and forms into a variety of formats such as text, searchable Adobe PDFs or Microsoft Word. Easy to use image enhancing features help improve document quality. Process using OCR, barcode, image management, document services and document conversion to brain up your network.

Route

Using the most current information, eliminating delays and using speed for a competitive advantage is what the real-time enterprise is all about. Deliver your documents instantly to one or multiple destinations, including PCs, fax applications, line of business applications, email, FTP sites, network folders and archives, as well as document management systems.

Unite paper and electronic forms processing

Forms processed or signed electronically are converted to images equivalent to those generated through manual paper driven document processing.

How AutoStore works

Successful information management can help elevate a company from startup to success. So, it's important to make sure your company has the best resources and technology available to handle both its print and electronic documents. With more than 150 integrations, AutoStore has the capability to help manage your information workload.

Key features

- Works with all major manufacturers
- Integrated LDAP connector
- Bi-directional database lookups
- Document image processing
- 40+ free backend connectors
- 1D/2D barcode recognition
- Capture paper and electronic documents from any source
- Front panel browse-to-scan
- Route to SharePoint
- One touch multi-route
- PDF & PDF/A support
- Personalized scan menus
- Capture from any email account
- Send to email
- MRC PDF compression
- Open XML document support
- Camera and smartphone image processing
