

SiteAudit Analyzer

The Next-Generation Reporting Tool for MPS Fleet Managers

SiteAudit Analyzer is the next-generation fleet analysis and reporting tool. MPS users select from single or across multiple customers and connect SiteAudit data to a set of analysis charts. Analysis filters provide chart flexibility before inclusion into reports and presentations. It uncovers cost savings opportunities such as supply waste or used to show monthly volume trends. Two capability levers are offered, the OneClick user easily works with a set standard reports charts. The Designer user can create custom charts to meet any reporting requirement.

SiteAudit Analyzer bar chart reports the optimal fleet size based on volume, age, utilization and more

At a glance ...

- Fleet Analysis and Reporting for Audit and Fleet Management
- Show Volume Trends in Microsoft PowerPoint or MS Word Reports
- Analyze Inventory Mix Against Fleet Age and Utilization
- Perform Single Customer Analysis or Across Multiple Customers
- Quickly Establish Optimal Fleet Sizes for Audit Proposals
- Identify and Chart Supply Replenishment Problems
- OneClick Users Easily Produce Report Analysis and Charts
- Designer Users Create Custom Analysis and Charts
